I must apologise for not replying to yours of the 13th Nov earlier, but have been so busy packing orders for America that I have not had time. The flower drawings came from the sale of Admiral Stopford's effects in Dorset, some years ago & there were no more vols as I particularly looked. If my memory serves me rightly the village was Lwerne Bourtonay, & the Auctioneers Messrs Senior & Godwin of Blandford.

Yours faithfully E.W. Stevens
